A tiny microservice for client side
GitHub authentication.

CERTIFICATIONS

Red Hat Certified System
Administrator
Microsoft AZURE214x

04.05.2020

EXPERIENCE

Infomagnus LLC

Consultant

Jun 2019 – present

Hyderabad, TS

- Implemented a role based access control layer using a customized rule engine, which is being used by at least 100,000 users.
- Developed a framework around Flask, which is being used across different retail projects as a part of domain driven development.
- Designed a non-blocking & asynchronous task scheduler using Celery & Docker.
- Worked closely with the DevOps team to help setup the common CI/CD process across all projects in the company.

Turbot

Software Development Engineer

Jan 2018 – Jun 2019

Kolkata, WB

- As a member of core UI team built the instrumentation dashboard using React & D3.js.
- Architected the integration of AWS Inspector service which helped Turbot become a featured partner of Inspector.
- Made Turbot Azure CIS compliant by implementing most of the CIS Microsoft Azure Foundations Benchmark v1.0.0.
- Added object level access control restrictions for Google Cloud Platform storage service by building a custom inventory.

Wipro Ltd

Project Engineer

Jul 2016 – Dec 2017

Chennai, TN

- In a team of four, developed an IDE for a legacy Domain Specific Language & implemented Syntax highlighting & IntelliSense using Xtext framework for it.
- Made the case for moving to React + Redux & successfully ported the employee exit portal from angularJs to React.
- Won Wipro CodeExpress 2016 (Product Engineering Services) & Digithon (Wipro Digital).
